

CRJ Flight Training Device

The Aviator™ Flight Training Device (FTD) line from L3 Commercial Training Solutions (L3 CTS) features an aircraft specific flight deck, offering the form, fit, feel and function of the actual aircraft. The experience is further enhanced by realistic electrical flight control loading, sophisticated sound and audio simulation and an optional 220° field of view, multi-channel visual system that provides cues in day, dusk and night VFR and IFR conditions. These devices are ideal to give your students practical experience with the complex procedures and systems of the jet aircraft environment.

Training Programs Supported:

- Jet Transition
- Initial/Recurrent Training
- LOFT Scenarios
- Crew Resource Management (CRM)
- Multi-Crew Coordination (MCC)

Effective Training for:

- Flight Deck Procedures – Normal, Non-normal/Emergency
- Work Load Management
- Situational Awareness
- Crew Resource Management (CRM)
- Flight Deck Familiarity

Other Supporting Training Products:

- CRJ200 JetPac Courseware coupled with a free-play FMST and VFD
- CRJ200 Checkride App available for iPad®, iPhone®, and iPod Touch®
- CRJ700 ETHOS available for iPad® and online
- CRJ700 FMST
